PART 806—TECHNICAL DATA

Part 806 *Technical data*, is hereby amended to read as follows:

Sec.

806.1 Definition.

806.2 General licenses.

806.3 General provisions.

AUTHORITY: §§ 806.1 to 806.3, inclusive, issued under sec. 6, 54 Stat. 714; Pub. Law 75, 77th Cong.; Pub. Law 638, 77th Cong.; Pub. Law 397, 78th Cong.; Pub. Law 99, 79th Cong.; E.O. 8900, 6 F.R. 4795; E.O. 9361, 8 F.R. 9861; Order No. 1, 8 F.R. 9938; E.O. 9380, 8 F.R. 13081; E.O. 9630, 10 F.R. 12245; Order No. 390, 10 F.R. 13130.

§ 806.1 *Definition.* Technical data is hereby defined as "Any professional, scientific or technical information, including any model, design, photograph, photographic negative, document, or commodity, containing a plan, specification, or descriptive or technical information of any kind which can be used or adapted for use in connection with any process, synthesis or operation in the production, manufacture, reconstruction, servicing, repair, or use of any commodity."

§ 806.2 *General licenses*—(a) *Definition.* A general license is a license issued by the Department of Commerce for which no application is required, available for use by all persons, permitting

exportation of specified classes of technical data to specified countries or consignees in accordance with the regulations herein prescribed and those which may be prescribed at the time of issuance of such general license.

(b) *United States Government or agency thereof.* A general license is hereby issued permitting exportation of all technical data when consigned to any agency or instrumentality of the United States Government; *Provided*, That any technical data exported under this general license shall be intended for the official use of the United States Government or one of its agencies or instrumentalities. Any person exporting under this general license shall mark conspicuously on the envelope or outside wrapper "General License No. TD-U. S."

(c) *General technical data.* A general license is hereby issued permitting exportation of technical data to destinations in Country Group K as set forth in § 802.3 (a) of this subchapter; *Provided*: That such technical data are not restricted by any officer or agency of the United States Government against dissemination or exportation. Any person exporting under this general license shall mark conspicuously on the envelope or wrapper "General License TD-GEN".

(d) *Technical data exported with commodity.* A general license is hereby granted permitting the exportation of technical data which customarily accompany a commodity and which consist of drawings or instructions describing assembly, operation, testing or routine maintenance and repair, subject to the following conditions:

(1) The technical data is directly related to a commodity exported pursuant to an individual export license or other type of export license document issued by or under the authority of the Department of Commerce.

(2) The technical data is specified in the export license or other document under or pursuant to which such commodity is exported.

(3) The technical data is shipped in the same container as that used for the exportation of the commodity.

(4) The technical data included in such shipment does not include data pertaining to the processing or manufacturing of such commodity.

§ 806.3 *General provisions.* (a) No exportation may be made under any type of general license with the knowledge or intention that the technical data so exported are to be re-exported from the country of destination, unless the re-exportation has been authorized by the Department of Commerce, except that all technical data, the exportation of which is permitted under general license to any destination in Country Group K, may be re-exported from Canada or from any destination in Country Group K to any other destination in Country Group K provided that such re-exportation is not made to, or for the account of, any person, or the agent, representative, or member of the immediate family of any person who is on the American Proclaimed List.

(b) Technical data not exportable under the provisions of the general licenses described in § 803.2 must be sub-

mitted to the Department of Commerce, Office of International Trade Operations for examination, in accordance with the following provisions:

(1) *Mail.* Technical data to be exported by mail must be accompanied by a covering letter containing the following information: A caption showing name and address of the consignee and subject matter of the export material; a statement of the purpose of the exportation; an itemized list of the technical data items to be exported; and a statement as to whether or not the export material includes any data which has been restricted by any Officer or Agency of the United States Government against dissemination or exportation. The material must be submitted in an unsealed envelope or wrapper addressed to the consignee. Postage in stamps in an amount sufficient to cover mailing from Washington, D. C. to the foreign destination must be affixed to the envelope or wrapper. The material must be accompanied by all necessary customs declarations or stickers required by postal regulations, and must comply with the postal regulations governing the size and weight of the package. If approved, the material will be placed directly in the mail by the Department of Commerce. If not approved, it will be returned to the sender.

(2) *Express or freight.* Shipments of technical data to be exported by express or freight must be accompanied by a covering letter as required in subparagraph (1) of this paragraph (b).

Exporters who desire to have shipments forwarded by express or freight after examination by the Department of Commerce, Office of International Trade Operations, should make all necessary arrangements with the express or freight company so that the local branch of such company will pick up the shipment when requested to do so by the Department of Commerce, Office of International Trade Operations. If it is disapproved, it will be returned to the sender.

(3) *Cables, telegrams and radiograms.* Technical data to be exported by cable, telegram or radiogram, must be submitted to the Department of Commerce, Office of International Trade Operations, in triplicate (preferably on forms of the transmitting company), accompanied by a covering letter as required in subparagraph (1) of this paragraph (b), including instructions regarding payment of the charges. If approved, the message will be sent by the Department of Commerce direct to the transmitting company. If disapproved, it will be returned to the sender.

(4) *Personal messengers.* Technical data which is to be carried out of the United States as part of the personal baggage of an individual must be submitted to the Department of Commerce, Office of International Trade Operations, for review and sealing. It must be accompanied by a covering letter as required in subparagraph (1) of this paragraph (b), stating the name of the person who is to carry the material. It may be presented by the person who is to carry it out of the country, his agent, or by mail. If approved, the material will be appropriately sealed and returned. If

it is not approved, it will be returned to the sender.

(5) *Material not submitted for examination.* Exportation of technical data without prior examination by the Department of Commerce will be authorized only where it is shown that such material is too bulky for submission, or that extreme urgency or time requirements make it impractical or impossible to submit it for examination. In such cases, a covering letter must be submitted as required in subparagraph (1) of this paragraph (b), including in addition a statement of the reason for the nonsubmission of the material, a descriptive list, in duplicate, of the items to be exported, and the port from which shipment will be made. Prior approval must be obtained before effecting any exportation under this procedure.

(6) *Exportation of technical data in foreign language.* Technical data submitted in a foreign language to the Department of Commerce, Office of International Trade Operations, for exportation must be accompanied by a translation in the English language which has been duly certified as a true translation by an appropriate officer. The translation will be returned to the exporter after action has been taken.

(7) *Patent applications.* Technical data contained in papers relating to patent applications based on inventions made in a foreign country which are to be exported for informational purposes or for the purpose of filing in a foreign country; and technical data contained in papers relating to patent applications based on inventions made in the United States which are to be exported for informational purposes and not for the purpose of filing in a foreign country; must be accompanied by a covering letter containing the following information:

Whether application or amendment; country in which invention was made; U. S. serial number; title and brief abstract of invention; if an amendment to an application, whether or not the papers contain any new matter whatsoever; the name and address of the inventor as given in the original application and his present address, if known; and a statement as to whether or not the invention, patent or application therefor has been assigned and, if so, the name, address and nationality of the assignee.

Patent applications based on inventions made in the United States, amendments thereto, or other papers relating thereto, which are to be exported for the purpose of filing in a foreign country, are subject to regulations of the Commissioner of Patents, and, after licensing for filing by the Commissioner of Patents, are exportable under general license.

AUTHORITY: Regulations in this chapter unless otherwise noted at the end of documents affected, issued under sec. 2 (a), 54 Stat. 670, as amended by 55 Stat. 235, 55 Stat.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 32, as Amended Oct. 29, 1945]

INVENTORIES

(a) What this regulation does.

General Restrictions

- (b) Restriction on delivery.
- (c) Restrictions on receipts.
- (d) Restriction on ordering more than needed.
- (e) Adjusting outstanding orders when requirements change.
- (f) Restriction on processing.

Exceptions

- (g) In general.
- (h) Receipts permitted after contract cancellations or cut-backs.

Miscellaneous Provisions

- (i) Previous inventory authorizations.
- (j) Separate inventories.
- (k) Redistribution of excess inventories.
- (l) Violations.
- (m) Revisions of tables.
- (n) Appeals, letters and questions.

§ 944.53 *Priorities Regulation 32—(a) What this regulation does.* This regulation contains the inventory rules formerly in § 944.14 of Priorities Regulation 1 and in CMP Regulation 2. Its purpose is to prevent excessive inventories by restricting ordering, deliveries, receipts and processing of materials in short supply. All kinds of materials are covered including raw or semi-fabricated materials, commodities, equipment, accessories, parts, assemblies or products of any kind, whether or not acquired with priorities assistance.

The general rule on receipts is in paragraph (c) (1), and this is controlling unless a more specific limitation or exception is indicated in Table 1 or 2 or a direction to this regulation, or unless Table 3 (formerly Order M-161) exempts the material entirely. Other exceptions to the inventory limitations are stated in paragraphs (g) and (h) and in directions to this regulation.

General Restrictions

(b) *Restriction on delivery.* No person may deliver any material if he knows or has reason to believe that acceptance of the delivery would be in violation of this regulation.

NOTE: For rule on making or delivering material earlier than required by customers, see Interpretation 3.

(c) *Restrictions on receipts—(1) General rule.* A person may not accept delivery of any material if his inventory of that material is, or will be, more than a practicable minimum working inventory reasonably necessary to meet his own deliveries or to supply his services on the basis of his current or scheduled method and rate of operation.

NOTE: For rule on when material is considered to be in inventory, see Interpretation 4; for rule as to seasonal industries, see Interpretation 1.

(2) *Special rules in Tables 1 and 2.* If Table 1 at the end of this regulation shows a special inventory limit on a particular material or product (either specifically or by reference to another

WPB order or regulation), that limitation governs and the restrictions of paragraph (c) (1) above may be disregarded unless the applicable order or regulation (or a note in Table 1) also states that a practicable minimum working inventory may not be exceeded. The same is true with respect to particular classes of persons shown on Table 2. Where a specific period of time is shown on Table 1 or 2, no person affected may accept delivery of any material specified if his inventory of it is, or will be, more than he needs during the immediate period specified on the basis of his current or scheduled method and rate of operation. Even if an order or regulation is not listed on Table 1 or 2, any specific inventory limits imposed by it must be complied with. If an order or regulation listed on Table 1 or 2 is revoked or a listing removed from the tables all provisions of this regulation, including paragraph (c) (1), are automatically applicable.

(3) *Early delivery of steel, iron products, copper and copper base alloys.* Early delivery, up to 15 days before the requested delivery month, may be accepted from a producer of steel, iron products, copper or copper base alloys (in the forms listed on Table 1), but the producer may not make the early delivery if it would interfere with any rated orders. Other special rules on these materials are explained in Table 1.

(d) *Restriction on ordering more than needed.* (1) A person may not place any order, whether rated or unrated, for delivery of any material on earlier dates or in larger amounts than he would be permitted to receive under this regulation. Orders aggregating more than he is allowed to receive may not be placed with different suppliers even though he intends to cancel one or more of them before delivery. However, this restriction does not apply to materials listed on Table 3 of this regulation nor to purchases by ultimate consumers for personal or household use. The restriction does not forbid the placing of orders for delivery under the conditions explained in Interpretation 11 to Priorities Regulation 1, but such orders may not be scheduled for production as long as this restriction is effective.

(2) This restriction does not require immediate adjustment of orders placed before August 28, 1945. However, in view of its policy to prevent hoarding and speculative buying of materials in short supply, the WPB may direct adjustments or cancellations in individual cases where orders are in excess of reasonably anticipated needs especially where failure to do so might result in unbalanced distribution and curtail total production.

(3) If the inventory limits applying to any material are made more restrictive, whether by a change in Table 1 or otherwise, any person affected must immediately cancel, reduce or defer any order for the material to the extent that the scheduled delivery would result in an inventory greater than permitted by the new restriction and other applicable provisions of this regulation.

(e) *Adjusting outstanding orders when requirements change.* If because of a change in operations, slowing or stoppage of production, delayed delivery

by a supplier, or any other change in requirements, a person who has ordered material for future delivery would, if he accepted delivery on the date specified, exceed the limits prescribed by this regulation, he must promptly adjust his outstanding orders, and, if necessary, postpone or cancel them. Paragraph (h) below describes what further deliveries may be accepted.

(f) *Restriction on processing.* No person may process, fabricate, alloy or otherwise alter the shape or form of any material if his inventory of the material in its processed, fabricated, alloyed or otherwise altered shape or form is, or will be, more than a practicable minimum working inventory. However, this does not restrict a person from altering the form of surplus materials by scraping or reprocessing them, unless a WPB order specifically says otherwise.

Exceptions

(g) *In general.* This paragraph, paragraph (h) below, and certain directions to this regulation state general exceptions to the restrictions on acceptance of delivery described in paragraph (c) above, and to all other inventory restrictions on delivery and acceptance of delivery in WPB orders and regulations unless they contain specific provisions to the contrary. None of these or any other exceptions to WPB inventory restrictions on receipts permit a supplier to disregard any applicable WPB order or regulation which restricts production or delivery.

(1) *Exemption of Table 3 materials.* Materials listed on Table 3 at the end of this regulation may be delivered and accepted without regard to WPB inventory restrictions.

(2) *Materials bought under PR-13.* Priorities Regulation 13 provides a limited exemption from inventory restrictions in the case of items bought on special sales.

(3) *Imported materials.* A person may import any material without regard to WPB inventory restrictions, but if his inventory of it thereby becomes in excess of the amount permitted by this regulation, he may not receive further deliveries of it from domestic sources until his inventory is reduced to permitted levels. The inventory restrictions of this regulation do apply to any deliveries of the imported material he makes, and to the amount of it that any person accepting delivery from him may receive.

(4) *Advance stockpiling for civilian production.* A person may receive in anticipation of starting or resuming civilian production the minimum amount of material he would need during the first 30 days of such production, provided no priorities assistance is used to get the material. Records of such receipts and the basis on which they were computed must be preserved as required by § 944.15 of Priorities Regulation 1. This 30-day amount is a ceiling as far as advance stockpiling is concerned, and may not be considered as a "bonus" to be added to the amount of any material which a producer expects to have available for making his civilian product. Changes in this 30-day amount may be indicated for a particular material by a note in Table 1.

(5) *Minimum sale quantities.* Minimum sale quantities and production runs may be accepted to the extent permitted by Interpretation 2 to this Regulation. However, where Column 3 of Table 1 shows a specific amount of a particular material, that is considered to be the minimum sale quantity of it. Thus, if a person would be permitted under paragraph (c) to accept less than the amount shown, he may accept delivery of the full amount. In any event, after receiving a minimum sale quantity of any material, a person may not accept delivery of any additional quantities until his inventory of it is within applicable limits.

(6) *Small inventory exemption for particular materials.* If a note in Table 1 or 2 shows a specific amount of a particular material as a small inventory exemption, a person may accept delivery of any quantities of it as long as his total inventory of it after acceptance is no more than the specified amount.

(h) *Receipts permitted after contract cancellations or cut backs.* Where a person has promptly cancelled or cut back a contract with his supplier as required by paragraph (e) and the supplier is not otherwise prohibited from producing or delivering any material involved, delivery of it may be accepted and the inventory restrictions of paragraph (c) exceeded to the following extent only:

(1) Delivery may be accepted if the supplier has shipped the material or loaded it for shipment before the receipt of the instruction to cancel or cut back; or

(2) Delivery may be accepted of any special item which the supplier actually has in stock or in production or special components or special materials which he has acquired for the purpose of filling that contract. A special item, as used above, means one that the supplier does not usually make, stock, or sell, and which cannot readily be disposed of to others; or

(3) Even if the material is not a special item, delivery may be accepted from a producer if it has already been produced or is in production before receipt of the instruction to cancel or cut back, and it cannot be used to fill other orders on the producer's books.

NOTE: For special rules on continuing receipts of special items after contract cut backs, see Direction 3 to this regulation; and as to transfers of idle materials after cancellations or cut backs, see Direction 1. For effect of reduction in consumption rate on permitted inventories, see Interpretation 5.

Miscellaneous Provisions

(i) *Previous inventory authorizations.* Any specific authorizations, exceptions, or grants of appeals issued under § 944.14 of Priorities Regulation 1 or CMP Regulation 2 remain in effect according to their terms unless individually modified or revoked.

(j) *Separate inventories.* (1) In figuring his inventory, a person must include all material in his possession and all material held for his account by another person, but not material held by him for the account of another person.

(2) In the case of a person who on August 28, 1945, has more than one operating unit and keeps separate inventory records for them, this regulation applies

to each such operating unit or division independently. A person may not make any further separation or consolidation of such operating units without special written approval of the War Production Board, unless it is purely incidental to a separation or consolidation which is made primarily for other than inventory purposes.

(k) *Redistribution of excess inventories.* Excess inventories of materials and products, including inventories of materials which are in such form as to be unusable by the holder, are subject to redistribution to other persons by voluntary action pursuant to Priorities Regulation 13, or if necessary for national defense, through requisitioning by the War Production Board.

(l) *Violations.* Any person who willfully violates any provision of this regulation, or who, in connection with this regulation, willfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(m) *Revisions of tables.* Tables 1, 2 and 3, attached to this regulation will be revised from time to time. As materials and products become in more ample supply, it is expected that they will be listed on Table 3. In special cases, particular materials or products may also be removed from Table 3 or added to Table 1. It is, therefore, important to be familiar with the latest revision of the tables.

(n) *Appeals, letters and questions.* Any appeal or other question regarding any provision of this regulation should

be sent by letter in duplicate to the Office of Inventory Control and Surplus Utilization, War Production Board, Washington 25, D. C., Ref.: PR 32, unless Table 1 or 2 attached to this regulation indicates otherwise with respect to particular materials or classes of persons.

Issued this 29th day of October 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

TABLE 1—MATERIALS AND PRODUCTS SUBJECT TO SPECIFIC INVENTORY PROVISIONS

NOTE: Table 1 amended Oct. 23, 1945.

Explanation. Materials or products listed in Column 1 are subject to the specific inventory provisions shown, as explained in paragraph (c) (2) of the regulation, except to the extent that different rules may apply as to certain classes of persons under Table 2.

Column 2 shows either the WPB order or regulation which controls inventories of the material, or if no order is specified, there is shown a period of time representing the maximum inventory permitted as explained in paragraph (c) (2). An asterisk (*) indicates that the practicable minimum working inventory limit of paragraph (c) (1) also applies, that is, if it would be less than the specific limit indicated.

A figure in Column 3 shows the minimum sale quantity, that is, the amount of the particular material which a person may receive under the conditions stated in paragraph (c) (5), even if it is more than allowed under Column 2. If no figure is shown, the rule in Interpretation 2 must be followed.

Column 4 tells the Division or Office in the War Production Board to which should be sent any appeals or questions regarding the limitations described. However, if the applicable order says appeals are to be filed somewhere else, such as the nearest WPB field office, that provision controls.

Column 5 (Remarks) gives explanations, exemptions or other special rules applicable to the particular material or limitation.

Differences in color of insulation do not differentiate items of wire mill products. (2) The restrictions in this Table 1 on receipts of copper and copper base alloys, apply only to users of such materials, i. e., persons, including Government or related consuming establishments, who use any item of these materials for production, construction, operating supplies or maintenance and repair. They do not apply to producers who acquire copper or copper base alloys for the purpose of conversion into another listed form of these materials.				
				*The limitations in Column 2 on copper and copper base alloys apply only within the 48 States and the District of Columbia. See Table 2 for certain classes of persons to whom these limitations of Column 2 on copper and copper base alloys do not apply.

TABLE 2—CLASSES OF PERSONS SUBJECT TO SPECIFIC INVENTORY PROVISIONS

NOTE: Table 2 amended Oct. 29, 1945.

Explanation. The classes of persons listed in Column 1 are subject to the specific inventory provisions shown, as explained in paragraph (c) (2) of the regulation.

Column 2 shows either the WPB order or regulation which controls the inventories of the particular class of persons, or if no order is specified, there is shown a period of time representing the maximum inventory permitted as explained in paragraph (c) (2). An asterisk (*) indicates that the practicable minimum working inventory limit of paragraph (c) (1) also applies, that is, if it would be less than the specific limit indicated.

Column 3 tells the Division or Office in the War Production Board to which should be sent any appeals or questions regarding the limitations described. However, if the applicable order says appeals are to be filed somewhere else, such as the nearest WPB field office, that provision controls.

Column 4 (Remarks) gives explanations, exemptions or other special rules applicable to the particular class of persons or limitation. Where this column specifies certain materials, the limitation or exemption for the particular class of person applies only to the materials specified.

INTERPRETATION 1

INVENTORIES IN SEASONAL INDUSTRIES

Paragraph (c) (1) of Priorities Regulation 32 prohibits any person from accepting a delivery which will give him "more than a practicable minimum working inventory reasonably necessary to meet his own deliveries on the basis of his current or scheduled method and rate of operation". This does not prevent a person engaged in a seasonal industry who normally stocks up inventory in advance of the season from accepting delivery of his requirements of the inventory in question, provided (a) that he is not guilty of hoarding, and (b) that the deliveries accepted are no greater and no further in advance than those which he would normally accept in the ordinary course of his business to meet reasonably anticipated requirements. (Issued Aug. 28, 1945.)

INTERPRETATION 2

MINIMUM SALE QUANTITIES AND PRODUCTION RUNS

(a) *Applicable provisions of the regulations.* Priorities Regulation 32 forbids the making or acceptance of a delivery which will give the customer more than the "practicable minimum working inventory reasonably necessary" for him to make his own deliveries. A similar provision in paragraph (c) (2) of Priorities Regulation No. 3 says that a customer who is applying a rating for which no specific quantities have been authorized may use it only to get the "minimum amount needed."

(b) *Factors to be considered in determining how much can be ordered and delivered.* In determining a customer's minimum inventory "reasonably necessary" under Priorities Regulation 32 or his "minimum amount needed" under Priorities Regulation No. 3, it is proper in some cases to consider not only the immediate needs of the customer's plant but also whether the amount which he orders will be a minimum production run for his supplier. The customer may order and receive (and the supplier may deliver) the customer's requirements for a longer period in advance than he actually needs at the time of delivery if, but only if, it is not practicable for him to get the item from any supplier in the smaller quantities which he presently needs. The supplier may reject his customer's order if it is less than the minimum which he regularly sells or less than his minimum production run of a product which is mass produced under the conditions explained in Interpretation 3 of Priorities Regulation 1.

(c) *Relief in exceptional cases.* If the conditions stated in paragraph (b) above cannot be satisfied but the customer wants to order or accept delivery of more than his actual needs at the time of delivery, he should apply to the War Production Board for permission, stating the facts and why it is not practicable to satisfy the condition of paragraph (b).

(d) *Special provisions for certain materials.* Where a specific minimum sale quantity is shown in Column 3 of Table 1 of Priorities Regulation 32 with respect to any material or product, that quantity controls instead of the rule in this interpretation.

(e) *Specific limits on ratings may not be exceeded.* This interpretation does not apply to the use of a rating where a specific quantity is stated in the instrument assigning the rating. If a person is assigned a rating for a specific amount of material, he may not use it to get more. If he finds that he can only

get the material in larger quantities, he should apply for a modification of the rating.

(f) *No effect on contractual rights.* The times and amounts in which deliveries are to be made are to be determined by agreement between the supplier and the customer. Nothing in this interpretation relieves a supplier from fulfilling a contract to make deliveries at specified times in specified amounts. For example, if a customer has agreed to buy and a supplier has agreed to furnish 100 units a month for six months, this interpretation does not obligate the buyer to accept 600 units delivered during the first month, although it permits him to do so under the conditions described in paragraph (b). (Issued Oct. 1, 1945.)

INTERPRETATION 3

MAKING OR DELIVERING MATERIAL EARLIER THAN REQUIRED BY CUSTOMERS

(a) Paragraph (b) of Priorities Regulation 32 prohibits a person from knowingly making a delivery which will give his customer more than the latter is permitted to receive under the regulation. Paragraph (f) of that regulation prohibits a person from processing or fabricating material if his inventory of the material in its processed or fabricated form will be more than a practicable minimum working inventory. These two restrictions should be borne in mind by any supplier who wants to make or deliver any material to his customer earlier or in greater quantities than required by the customer.

(b) For example: A supplier has accepted his customer's order of a product to be delivered at the rate of 100 a month for six months. The supplier would like to ship 200 a month for three months, or perhaps the entire 600 in the first month. Since the customer's requirements of 100 a month are presumably all he could accept within the inventory limitations of paragraph (c) of the regulation, the requirement that the supplier may not knowingly ship more than this would prevent him from delivering earlier than required by his customer, unless he received notice from his customer that the receipt of the larger amount would not cause him to have an excess inventory.

(c) Thus, before delivering a material or product substantially earlier or in greater quantities than is called for by his customer's order, a supplier is required to satisfy himself that the receipt by the customer of the changed quantities will be within the permissible inventory limitations applicable to the customer. The supplier may rely on any statement or notice to this effect from his customer, unless he knows or has reason to know that it is false.

(d) Similarly, assuming his customer would not be permitted to receive the larger quantities, the supplier should take this into account in his plans for processing the material or product so that he himself will not have an inventory greater than permitted by paragraph (f) of the regulation.

(e) This interpretation, of course, does not change the rule on delivery or acceptance of minimum sale quantities or production runs to the extent described in Interpretation 2 to this regulation, nor does it prevent earlier delivery of iron products, steel, copper and copper base alloys under the conditions described in paragraph (c) (3) of Priorities Regulation 32. Also, if any WPB order or regulation permits increased deliveries to the extent necessary to avoid shipping partly filled containers (such as paragraph (y) (4) of Order M-300), the rule in this interpretation does not prevent such deliveries. (Issued Oct. 1, 1945.)

INTERPRETATION 4

INVENTORY MATERIAL

(a) Paragraph (c) of Priorities Regulation 32 prohibits a person from accepting delivery

of material if his inventory of it is, or will be, greater than the maximum prescribed. For the purpose of this regulation, material is considered to be inventory until it is actually put into process or is actually installed or assembled. Putting into process does not include minor initial operations, such as painting, and does not include any shearing, cutting, trimming or other operation unless such initial operations are part of a continuous fabricating or assembling operation. Nor does it include operations such as inspection, testing and ageing nor segregation or earmarking for a specific job or operation.

(b) For example, if a manufacturer who uses wire or rod cuts a sufficient quantity of it to length at one time to maintain his operations for a considerable period of time, the cut pieces remain as inventory until processed into another form or until assembled or installed.

(c) If a manufacturer purchases and stores steel castings in the form purchased, the steel castings are not put into process when the castings are painted and stored. Consequently, the inventory of castings includes those painted and stored.

(d) If a manufacturer shears steel sheet and stocks in sheared form, such stock is still part of his inventory, if the material does not continue in production. (Issued Aug. 28, 1945)

INTERPRETATION 5

EFFECT OF REDUCTION IN CONSUMPTION RATE ON PERMITTED INVENTORIES

(a) Paragraph (c) of Priorities Regulation 32 prohibits the acceptance of delivery of material if a person's inventory of it is, or will be, more than the amount permitted by the regulation. If material is acquired within these restrictions, the regulation does not prohibit the mere possession of an inventory if a change in circumstances makes it greater than the amount permitted. For instance, if based upon current rate of production a manufacturer's permitted inventory of one item of steel is 100 tons and he has in inventory 60 tons, he may receive a further delivery of 40 tons. If after receiving the delivery of 40 tons his rate of consumption, because of contract cancellation or the like, is reduced drastically, the mere fact that he has an inventory of 100 tons, although his permitted inventory may be only 10 tons, is not a violation of the regulation. He may not, of course, accept any further deliveries of that item of steel until his inventory has been reduced below 10 tons (except as provided in paragraph (h) of Priorities Regulation 32 and Direction 3 to that regulation, relating to material already shipped, special items, etc.)

(b) Similarly, the regulation does not affect the liability of a customer for material in inventory when the customer cancels his contract. Such liability is controlled by the provisions of the contract between the customer and his supplier and by contract law. (Issued Aug. 28, 1945)

PART 1364—FRESH, CURED AND CANNED MEAT AND FISH PRODUCTS

[MPR 579, Amdt. 13]

CERTAIN SPECIES OF FRESH AND FROZEN FISH AND SEAFOOD

A statement of the considerations involved in the issuance of this amount has been issued simultaneously herewith and filed with the Division of the Federal Register.

Maximum Price Regulation No. 579 is amended in the following respects:

1. A new section 3.12a is inserted between the sections 3.12 and 3.13.

Sec. 3.12a *Winter allowance for certain items of frozen fish.* (a) Any person making a sale of any of the items listed in paragraph (c) may add to the appropriate table price the applicable amount listed in that paragraph, but only if:

(1) Such fish has been landed and frozen in the United States. (This allowance may not be added for imported fish.)

(2) The seller has since September 30, 1945 sold without adding this allowance (on the basis of the summer prices) an amount equal to his inventory on September 30, 1945 plus an amount equal to his total domestic purchases of the item made since that date on the basis of the summer prices and his total imports of the item.

(3) The seller has complied fully with the reporting requirements in paragraph (b).

(4) The seller (other than a processor) has received an invoice setting out this allowance separately. (The allowance must be stated on the invoice pursuant to section 3.2 (c).)

(5) The seller has added no storage allowance under section 3.13 (b).

(6) Such fish is delivered to the customer prior to April 1, 1946 in the case of a sale by a processor and prior to April 16, 1946 in the case of a sale by a wholesaler.

(b) *Reporting requirements.* The allowances provided in this section 3.12a may not be added unless and until the seller has filed with the Office of Price Administration, Washington, D. C., the following information:

(1) His inventory of any of the listed items on hand on September 30, 1945 where such inventory is over 1000 pounds.

(2) Monthly reports of his inventory of any of these items on hand at the end of the last day of each month beginning with October 31, 1945.

(3) Monthly reports of the quantity of each of these items purchased during each month beginning with the month of October 1945 (i) at prices including the allowances (winter prices), (ii) at prices not including the allowances (summer prices) and (iii) as imports. For each purchase of more than 500 pounds, the name and address of the person from whom the purchase was made, the price paid and the freezers or other places of business from which delivery was made and to which delivery was made must be set out.

(4) Monthly reports of the quantity of each of these items sold during each month beginning with the month of October (i) at winter prices; (ii) at summer prices. For each sale of more than 500 pounds, the name and address of the customer, the price charged and the freezers or other places of business to which delivery was made and from which delivery was made must be set out.

(5) Each report must be signed, dated and must contain the name and address of the person reporting. In the case of the inventory reports provided by Nos. 1 and 2 the report must contain the addresses of the places in which the inventories are stored stating separately the amount stored in each place. All monthly reports must be filed with the Office of Price Administration at Washington, D. C. before the 10th of each month. A seller must file monthly reports required by Nos. 2 through 4 with respect to any item only where his inventory (amount he owns) of the item for which no winter allowance may be added exceeds 1000 pounds at any time during the month for which or for the end of which a report is required. Note, however, that all sellers, whether or not they must file reports can take the allowance only if they meet all the requirements of paragraph (a). All sellers must, of course, keep records in accordance with section 1.6.

(a) *Delegation of authority to fix area maximum prices (dollar and cent) at all levels for certain paper products.* Any Regional Administrator of the Office of Price Administration may, notwithstanding any maximum price regulation, schedule or order, establish dollar and cent ceiling prices and grant adjustments thereof by order for the items specifically designated in paragraph (b) of this order in any area or locality within his jurisdiction. Such orders shall be submitted to the National Office, Paper and Paper Products Price Branch, Office of Price Administration for its approval before issuance by the Regional Administrator.

(b) Commodities subject to delegation of authority. The following paperboard commodities may be the subject of area dollar and cent maximum prices:

Bakery Boxes
Egg cartons
Garment boxes
Laundry boxes
Paperboard coat hangers

For the purposes of this general order: "Bakery boxes" includes all folding boxes of the type customarily used by bakers for the packing of cakes and other bakery products sold over the counter at retail except such boxes which are specially fabricated for a commercial baker.

"Egg cartons" includes all boxes of the molded, folding, or set-up type which are designed for the purpose of packing one dozen or one half dozen eggs.

(c) Whenever an order establishing maximum prices for any of the items named in paragraph (b) above, has been issued after submission to and approval by the Office of Price Administration, Washington, D. C., it shall supersede the maximum prices established for any of the items affected in any existing maximum price regulation, schedule or order.

(d) Existing price levels shall be generally preserved in fixing dollar and cent prices for the items enumerated in paragraph (b) of this section, except:

manufactured gas, oil, or kerosene, or any derivative of the foregoing fuels, at any rate from none to full, attached to an appliance designed for heating or cooking purposes either at the point where such fuel is to be used or inserted in the fuel supply line of such an appliance.

(b) *Maximum prices for manufacturers.* The maximum prices for sales by a manufacturer of gas appliance valves to manufacturers of the types of the appliances set forth in (a) shall be the total of the following factors:

(i) Multiply the labor rate for each operation by the actual time expended on each operation; and

(ii) Divide the sum of the totals for all operations performed on each valve as computed in (i) by the total number of units produced.

(3) The dollar and cents gross mark-up. The dollar and cents gross mark-up shall be determined as follows:

(i) Subtract from the gross sales of gas appliance valves for the calendar year 1941, the direct actual material and labor cost expended in the production of gas appliance valves during such calendar year;

(ii) Divide the resulting difference by the direct actual material and labor costs expended in the production of gas appliance valves during the calendar year of 1941; and

(iii) Multiply the sum of the costs determined under (1) and (2) by the percentage thus obtained.

(c) *Cash discounts, allowances and services.* The maximum prices established by this section shall be subject to cash discounts and allowances and to the rendition of services at least as favorable as those which the manufacturer extended or rendered or would have extended or rendered to purchasers of the same class on similar sales during the period October 1-15, 1941.

(d) *Records.* Every person selling gas appliance valves subject to this section shall have available for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, a record of each sale made under this section showing the date of the sale, the name and address of the purchaser, the plate number, the material and labor

This statement must include a breakdown of cost of goods manufactured and sold, segregated as to materials consumed, direct labor and manufacturing overhead, together with pertinent inventory adjustments, and of Selling, General and Administrative expenses applicable to this phase of operations.

(f) *Notification of purchasers.* Every manufacturer selling gas appliance valves subject to this section shall send a notice to every purchaser of gas appliance valves covered by this paragraph at the time of the first invoicing stating substantially as follows:
